

INFRALERT project launches new website

The INFRALERT project website www.infralert.eu has been launched today. It is a platform for dissemination of project objectives and achievements which will keep you and interested stakeholders up to date of the latest project developments. At this moment, it includes a schematic project description together with information about the consortium partners. As the project evolves, it will include news, events, newsletters, leaflets papers, and public deliverables among others.

Our stakeholders will be able to subscribe to our Newsletters and RSS feed service. Visitors are welcome to include comments on our news. Interaction with Social Media, such as Twitter and LinkedIn, is also possible through the website front page.

Information about open workshops and webinars will be included in the 'News & Events' section where registration will be possible. In order to assess the public perception of the project and the problems addressed by its developments, the website will be also used for surveys.

Contact:

Project Coordinator: axel.simroth@ivi.fraunhofer.de / Technical Manager: noemi.jimenez@cemosas.es

*INFRALERT is coordinated by Fraunhofer-Gesellschaft and developed in cooperation with 6 other partners: CEMOSA, DMA s.r.l., Regens Informatikai Reszvenytársaság, Universidad de Sevilla, Lulea Tekniska Universitet, Estradas de Portugal S.A
INFRALERT is co-financed by EU within the Horizon 2020 – the Framework Programme for Research and Innovation (2014-2020).*
